A warm heart of your home

Thermal Stores to work with all energy sources:
Jaspi Hybrid - ultimate flexibility and efficiency

Jaspi Hybrid Thermal Stores

Hybrid advantage Future is here

For all energy sources

Jaspi Hybrid Thermal Stores are designed the future in mind.

Multiple connections are placed on optimal locations for different heat sources. Connecting to multiple heat sources is easy and quick. The same goes when adding new heat sources in the future.

Narrow and low design minimises the footprint and the tanks can fit through most of the doors.

All included design & efficiency

Our Hybrid stores are fitted with 3 indirect coils as standard. High power domestic hot water coils will provide mains pressure DHW whilst the third coil can be used for Solar systems, wood fires or heat pumps.

Unique heat molded high density insulation guarantees an ultra-low heat loss.

Easy installation - All the connections are on the front & top of the unit.

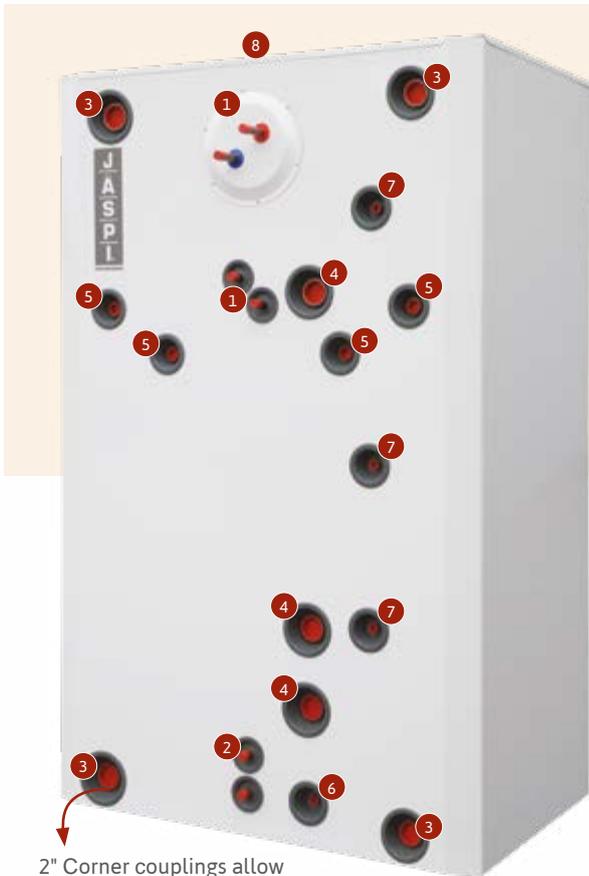

Internal baffle plate ensures an optimal heat layering, important when the store is connected to solar or heat pumps. Multiple immersion heater connections can be used for Solar PV or mains power back-up.

A century of knowledge

Jaspi has been making heating equipment for a long time. Hybrid Thermal Stores show this experience from design to the manufacturing where only the highest quality materials are used.

Oval Hybrid 1000 l and 2000 l

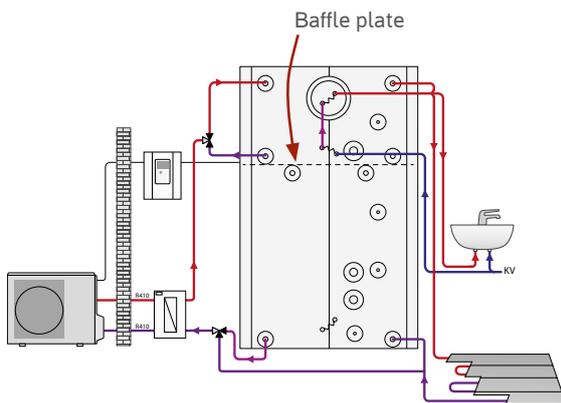

2" Corner couplings allow high flow and larger pipe size connections.

Couplings

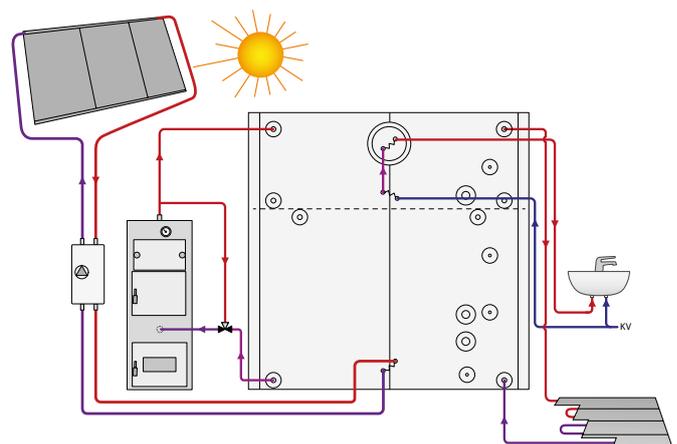

- 1 Domestic hot water coil Ø22
- 2 Solar coil Ø18
- 3 Heat & radiators flow/return 2"
- 4 Immersion heater 2"
- 5 Heat & radiators flow/return 1"
- 6 Drain 1/2"
- 7 Thermostat / Thermometer 1/2"
- 8 Airing / Expansion 1"

Jaspi	Oval Hybrid 1000	Oval Hybrid 2000
H x W x D	1730 x 1260 x 780* mm	2010 x 2020 x 780* mm
Capacity	1000 l	2000 l
Weight	350 kg	510 kg
Working pressure	3 bar	3 bar
Part No	5236183	5236185

* + Coil tail ends <50mm

Oval Hybrid 1000 connected to the heat pump, underfloor heating and domestic hot water.

Oval Hybrid 2000 connected to the Jaspi YPV40 wood boiler, Solar panels, underfloor heating and domestic hot water.

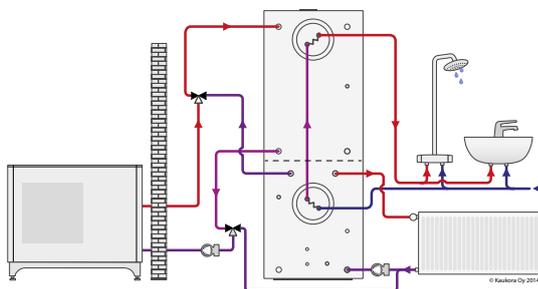

Ultrastore 500 l

Couplings

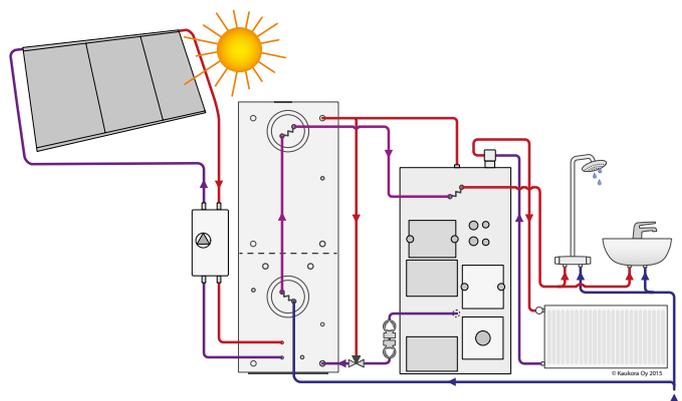

- 1 Domestic hot water coil Ø22 Solar
- 2 coil Ø18
- 3 Immersion heater 2"
- 4 Heating / radiators Flow & Return 1"
- 5 Drain 1/2"
- 6 Thermostat / thermometer 1/2"
- 7 Airing / expansion 1"

H x W x D	1820 x 670 x 670* mm
Capacity	500 l
Weight	230 kg
Pressure	3 bar
Part No	5236214

* + Coil tail ends

Jaspi Ultrastore 500 connected to a heat pump (Jaspi Comfort Mono), radiators & domestic hot water.

Jaspi Ultrastore 500 connected to a Jaspi Duo multienergy boiler, Solar panels, radiators & domestic hot water.
